

THE IMPORTANCE OF A DENTAL WELLNESS CHECK

COMFORTABLE. FAST. RADIATION FREE

The iTero Wellness Scan helps identify changes that are difficult to see:

- Changes in tooth position
- Wear, cracks, or chipping
- Gum recession or inflammation
- Potential bite issues

The iTero Wellness Scan tracks your dental health over time:

- Compare images from visit to visit
- Monitor subtle changes you may not feel or see
- Show you exactly what's happening in your mouth

Finding these changes early allows us to treat problems before they become costly or painful.
